dailypoint™
Central Data Management

SWITCH YOUR PMS WITHOUT DATA LOSS

MARCH 2022

dailypoint™ can transfer your existing guest data to your new PMS. Secure, smooth & automated.

www.dailypoint.com

case study

SITUATION

You would like to switch your PMS Vendor and get started with a new, probably cloud-based PMS solution? We can support you and ensure that there is no loss of data and a secure, smooth & automated transition. **dailypoint™** offers the best two-way integrations with most of the leading property management systems. If you want to switch to a different PMS, **dailypoint™** can not only clean your existing guest data but also transfer your data to your new PMS. The migration service includes guest profiles & reservations. Save money and hours in manual labor and avoid human errors. Plus, **dailypoint™** can retain guest history and statistics.

ADVANTAGES

NO DATA LOSS

- Guest history can be imported

DATA CLEANSING & MERGING OF PROFILES

- Creation of one central & consolidated profile per guest

NO MANUAL TIME-CONSUMING WORK

- Future reservations and profiles can be transferred to the new PMS

PROJECT SAMPLE

EASYHOTEL, UK

easyHotel, a UK based hotel group with 36 budget hotels, moved from Hetras PMS to Oracle OPERA Cloud. With the **dailypoint™** migration service, guest profiles and live reservations could be transferred from the legacy PMS to Oracle OPERA Cloud.

OTHER REFERENCES:

- Cresta Palace Hotel, Celerina, St. Moritz (CH) from protel to MEWS
- Royal Champagne Hotel & Spa, Champillon (FR) from Oracle Opera to Infor HMS
- REVIER Hospitality Group (CH) 1 hotel from protel to MEWS

- Seetel Hotels (GE) 11 hotels from Oracle Suite8 to OPERA Cloud

THE EXPERT'S THOUGHTS:

"Hotels are prisoners of their data and existing software. They know about the necessity and want to use modern cloud systems, but risk losing their data while undergoing open-heart surgery."

*Above property providers like **dailypoint™** support this process by enabling a controlled, step-by-step transfer of all data, while improving the guest journey and the hotel's software architecture. This approach has proven very successful in various projects and enabled quick transitions."*

Marc Fries from agilotel, a consulting agency for software architecture & digitalisation projects for hotels
